

## Dashboard - Screenshots

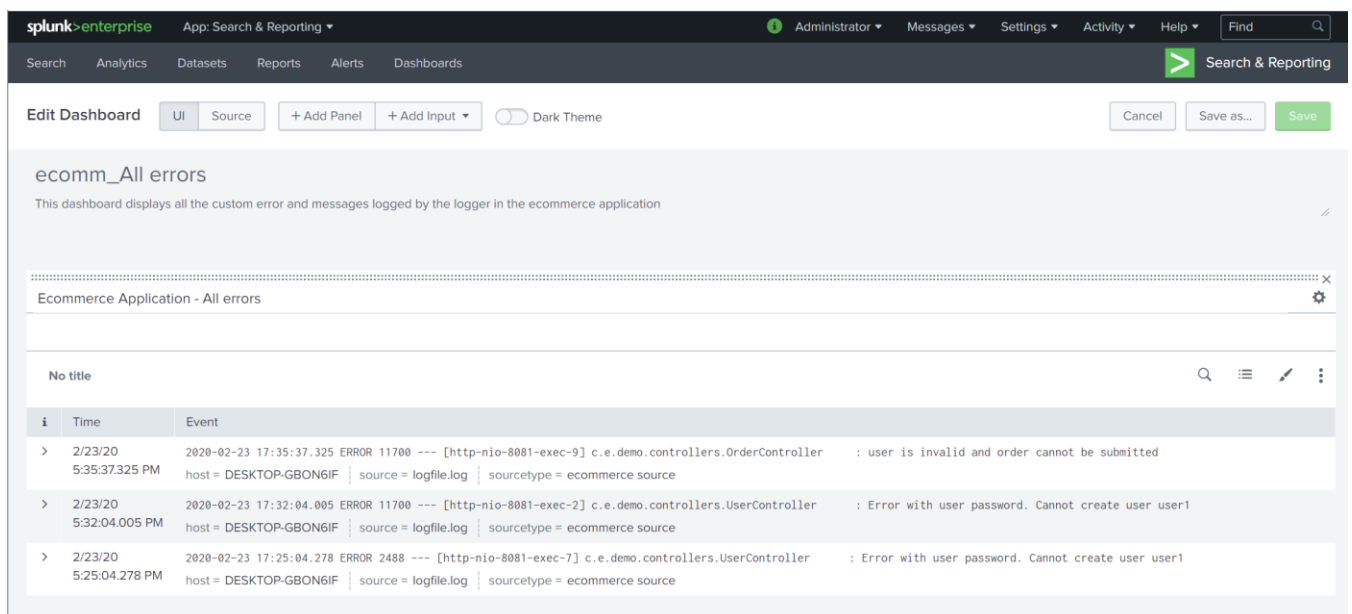

The screenshot shows the Splunk Dashboards page. The top navigation bar includes the Splunk logo, 'App: Search & Reporting', and various user and system menus. Below the navigation bar, there's a 'Dashboards' section with a 'Create New Dashboard' button. A list of 6 dashboards is shown, with filters for 'All', 'Yours', and 'This App's'. The list includes two dashboards: 'ecomm\_All errors' and 'ecomm\_user created successfully', both owned by 'rekhas' and set to 'Private'.

i	Title	Actions	Owner	App	Sharing
>	ecomm_All errors	Edit	rekhas	search	Private
>	ecomm_user created successfully	Edit	rekhas	search	Private

## Dashboard – ecomm – All errors

The 'Edit Search' dialog box is shown. It has a 'Title' field and a 'Search String' field containing the query: `index=*_ OR index=* sourcetype="ecommerce source" ERROR`. Below the search string is a 'Run Search' button. There are also settings for 'Time Range' (set to 'Use time picker'), 'Auto Refresh Delay' (set to 'No auto refresh'), and 'Refresh Indicator' (set to 'Progress bar'). At the bottom are 'Cancel', 'Convert to Report', and 'Apply' buttons.

The screenshot shows the 'ecomm\_All errors' dashboard. The title is 'ecomm\_All errors' and the description is 'This dashboard displays all the custom error and messages logged by the logger in the ecommerce application'. Below the title is a search bar and a 'Dark Theme' toggle. The main content area shows a table of error events.

i	Time	Event
>	2/23/20 5:35:37.325 PM	2020-02-23 17:35:37.325 ERROR 11700 --- [http-nio-8081-exec-9] c.e.demo.controllers.OrderController : user is invalid and order cannot be submitted host = DESKTOP-GBON6IF   source = logfile.log   sourcetype = ecommerce source
